Rose at Romero
near which were Prairie
Dogs. Scattered villages
all the way from near
Romero to Hebron, al-
though the waters were
thickly coated with ice
the Dogs were out sun-
ning themselves.

East of Romero I saw
2 *Pipilo crissalis* &
one Long-crested Jay
Many Ravens, a dark
Archibuteo, Shore Larks
At Hebron saw the
first Magpie.

7 flock of Cowbirds
(8) at Colman, N. Br.

Magpie and
Capodacus m. frontalis
seen at Earl, Colo.
Magpies and nests seen
on both sides of Rocky
Mtn. divide.

Reached Syracuse at
dusk. Prairie Dogs
seen east to Coolidge
Large flocks of Red-wing
Blackbirds between
La Junta and Syracuse
Big flocks of *Otocoris*
everywhere

Pigeon Hawk at La Junta

Nov. 24, 1904, - Crossed
Missouri from Kansas City
to St. Louis. Saw a Hawk
Bobwhites, Bluebirds,
Juncos, Crows, English
Sparrows, Red-tailed Hawk

The Moonia, McPherson
Ave., + Kings Highway

Ella: -
520 N. Spring.

At Circleville, Ohio, Nov. 30
to Dec. 5, 1904, saw Gray
Squirrels, a few Cardinals, a
few Tufted Titmice, many
Tree Sparrows, a Sparrow-
Hawk, Many English Sparrows

Left Circleville, Ohio
Dec. 5, 1904. Between Circle-
ville and Columbus
saw 2 Sparrow Hawks,
and one Gray Squirrel.

East of Columbus, Ohio,
Dec. 15, saw one Red-tail.

Friday, October 1904.

On awaking this morning
about a dozen Black-
footed Albatrosses were
seen following the ship.

55. *Zyzomela*
rubrata (Less.).
Native name Egigi.
Red Honey-eater.

47 *Collocalia*
fusciphaga (Thunb.).
Native n. Gagaguag.
Swift.

Herbert S. Miller, Jr.
Leyden, Holland
C/O Mr. J. A. ^{Netherlands} Gentink.
Hotel ~~Marshall~~
38 & 7th Ave.
a good very hotel.

Oct. 10, 1904

A Blue-faced Booby
flew around the ship.
Its plumage was white
except black wingtips
and nearly all black
rectrices. Bill apparently
straw color. Face bluish.
A fine large bird.
It dashed to the
water and caught
several fish, decidedly
at about this
angle. Sula
cranops.

The Golden Plover
was still flying feebly
around the ship at 5 P.M.
At 6 P.M., dusk the
plover still was
fluttering along side.

October 11, 1904.

No bird was seen
in the morning save
a "white Gull," which I
did not see myself.

About noon a pair
of Black-footed Albatrosses
joined us and remained.
Golden Plover has disappeared.

October 12, 1904.

This morning only the
two Albatrosses are
with us.

Oct. 13

Three Albatrosses. No other
birds.

a Turnstone flew
around and over the
ship several times.

A Golden Plover
accompanied the ship
and probably came
aboard.

White-breasted Shearwaters
were rather scarce.

October 10, 1904.

The Golden Plover
still follows the ship
occasionally, circling
around and over it,
fly close alongside at
times and whistle
plaintively. It seems
very weak and tired. Once
it flew out of sight and
rose very high but soon
returned.

Oct. 8, 1904. - Landed

Wahia

October 9, 1904. - Left
Honolulu at 5:30 P.M.
yesterday. This morning
several small white &
breasted sea birds
were the only birds seen
During early afternoon

October 6, 1904.

Passed small island to the south during forenoon.

Plenty of Shearwaters.
No other birds

October 7, 1904.

Flocks of White Terns, quite large seen during the morning. About noon we passed the island of ~~Modulmann~~ ^{Perid Island}, or having a profile, as approached from the west like this:

Another good-sized island to the left like this

, but much smaller than the other.
Perid Island

Oct. 4, 1904. - A bird circled around the ship several times which even the ship's officers said was a Duck. I did not see it.

In the afternoon a small Curlew and two ~~Gadwits~~ ^{Gadwits} ~~Gadwits~~ ^{Gadwits} followed the ship, whirling as they flew. During brief squalls they close along our lee almost against the ship. The large Petrel grows scarce, and Shearwaters are getting more numerous. One Frigate Bird seen. No Gulls or Terns

seen since we left Japan.

October 5, 1904. - Few if any Petrels seen. Plenty of Shearwaters. A few Boobies. One Frigate Bird.

Two Gadwits, perhaps the same two Gadwits seen yesterday flew around the ship many times, again coming in close under our lee side to escape during squally flurries.

1st Officer of the
"Logan" says that
birds not infrequently
come aboard, tho'
not on every passage.

The birds he remem-
bered are Albatross,
Booby, Storm Petrel,
and a small bird "like
a Rice Bird" (off Japan),
besides those of this trip.

Oct. 2, 1904, a Whale
was seen spouting.

W. H. Brewer
Chamberlain
Oct. 2

October 4, 1904.

A good many Petrels
have been seen during
the day. There were two
species a large ^(Shearwater) and small
^(Petrel) one; One of the large
ones came aboard ship
at dusk: —

No. 13737, Petrel ♂ ad.

Right wing,
Shearwater (No. 13737).

L. P. Brist.
M. A. S. "Logan"

Size of Golden Plover,
plain gray above
white below with
a white line beginning
at the bill, passing
through and beyond
the eye thus:

Eyes prominent.

Oct. 4, 1904. - To-day
Shearwaters, Petrels,
Albatrosses, and
Boobies are with us.
The Midway Islands
were passed at 4 a.m.

The Boobies fly
close around the ship.
Head, neck, & upperparts
dark; underparts and
neck-ring white. Bill
apparently white. Ap-
-peared to want to
settle on the ship.
Could not see color of face.

Plenty of Petrels
like No. 13 & 37 all
day, skimming the
water with Shearwaters

half of toes and webs,
flesh color; distal
half of webs and toes,
and all of ^{claws} nails, black.

Lining of wings all
white on humeral joint;
on 2 rows of greater
coverts of forearm joint;
and with one row of
great coverts of carpal
joint white shot with
gray.

A good many of
these birds have
joined the ship; or,
rather, we seem to
be crossing the
feeding ground of its
species.

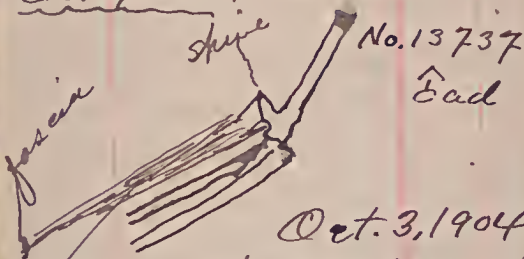

Note. - The Wader
that came ^{aboard} ~~askore~~
September 27, two days
after passing the last of
the outlying islands of the
Japan Archipelago, lit
on the railings, and was
picked up by hand and
put in a stateroom,
whence it escaped
by a porthole and
settled on another
part of the ship.

Mr. J. P. Brust
thus describes it:
A long-legged wader
having yellow legs
and feet; a long (2 inches)
black bill slightly arched.

Island. It is very high, steep, rocky, and rather barren.

No trees could be distinguished; but the whole top of the island was green. and bushes could be made out. There seemed to be plenty of grass. Perhaps 2 miles in diameter and 400 miles off the Asiatic coast. The other island is said to be much larger. Probably no inhabitants

Oct 3, 1904. - Petrel

Oct. 3, 1904

Heavy muscle inserted in carpal fascia. Came aboard the U.S.A. Transport "Logan".

Lat $29^{\circ} - 22' N$, } 200 m
Long. $177^{\circ} - 59' E$. } west of
Madag. Island

333; 770; 227; 133; 25.5;

30; 35. Depth of bill in front of tubular process,

8.5; diameter of eye, 8;

bare portion of tibia, 14.

Iris dark brown. Bill black.

Tarsi & bare portion of tibia, and basal half

a few small ones
like our piping Hylas.

Sept. 26, 1904. - A few
dusky Shearwaters
dusky above, white below.

Sept. 27, 1904. - Dusky
Shearwaters. A Wader
size of Golden Plover
came aboard. I did not
see it, but it was
described to me as white
below, gray above,
pop-eyed, with ^{2 in long} black bill
yellow legs and feet.
White ^{from bill over eye} ~~line~~ It remained on
the ship a day and
then disappeared.

(See Oct. 2, later)

October 3, 1904.

A few Dusky Shearwaters
were seen daily until
Oct. 1st. Then no bird
until to-day, when
one Albatross appeared
early in the morning.
At ten Am there were
two; at 4 P. M. three.
~~On Sept. 25 we~~
~~passed between two~~
~~islands - the last of~~
~~the Japan Archipelago~~
~~The one on our left~~
~~was not in sight; but~~
~~we got a good view~~
~~of the one on our right~~
~~which is called~~
~~Mosimi or Swan~~

Small Flycatchers
Hornbills skimming over
the ricefields. A large
Eel caught by jinrikisha
men, and cooked for
us at tea house
Lotus fl. = Hoss-el.

Sept. 21, 1904

Called at 6:30. Breakfast
= last 7. With Dr. McE,
Gowen took jinrikish
with 2 men and
crossed the mountain
to Mogi. Collected
Crabs, shells, etc. Saw
Yellow-breasted Budytes
Crows, Tree Sparrows.
Returning from Mogi,
we stopped our jinrikishas
at a bridge and followed
a stream up into the hills
to the left. Fresh-water
shells and Crabs were
abundant; and there
were many Frogs, some
smooth, some rough, and

Sept. 20, 1904.

Sept. 21, 1904.

Slept at Nagasaki Hotel.
Took 8:20 train Onuma
when jinrikisha men took
us to the temple—a forti-
fied place on which the
temple stands surrounded
by trees + shrubbery—
pine, cypress, juniper,
suet, & tall deciduous
trees, in which I saw
Crows, Hawks,
Blue-gray black-collared
Titmouse, long slim
Budytes-like bird with
black stripe from chest
to tip of inner side of
tail. Many Passer
+ birds like Dendroica pinus

Sept. 16, 1904. - At sea. Plenty of flying fish. No birds seen all day. After dinner won a game of whist & at 8:30 P.M. saw the lighthouse on the N. end of Suison disappearing

Sept. 17, 1904. - Passed the Island of Formosa, which is high, rough, forested with many grassy openings, especially on the slopes near the sea. Off W. Formosa saw one Sterna bergii, the only bird seen since leaving Manila.
Sept. 17, 1904. at sea.

Mt. Morrison 10800 ft. high, towered high among the clouds.

Sept 18, 1904. - At sea. Several boobies (Sula), dark above, pure white below, yellow bill & face. Tried to alight aboard ship. Sterna bergii and a small tern in flocks.

Passed to left of small islands

Sept. 19, 1904. at sea
RR. Nagasaki to Moji
Morning train to Onoda
5:58; 8:20; 9:45

Returned at 2:20; 4:04; 6:05

Reached Nagasaki 3:55; 5:38 &
7:40

Thailand, P. O. Sept. 15, 1904.

Left the Hotel Reserve
Hospital at 8 A.M. Spent
two hours in the museum
of the Jesuit
college, and left about
10:30 A.M. for lunch
to the U. S. A. Y. Loggia.

Until 12 M. was busy
saying good-bye to friends
in the city. Thailand
dressed over with banded
wings. Hundreds of Tree
Sparrows (Passer montanus).
✓ Large dark birds with
white tails & white spot
on wings. In an city
saw & sighted in grass
beside the ^{at} ~~road~~. At

evening this species
assembles in noisy
flocks in trees. Tamias
mandchuricus rattled
from overhead wires.

Over the Bay are
flocks of White-headed
Kites.

✓ Myrads of little silver-
sided fish (one nibbling
at bits) of bread thrown
from the dining-room.

Thailand's quarters were
pulled out from behind
the main building
at 3 P.M. Passed
Corregidor Id and
Mariveles before dark.
No birds seen.

Slept well this night.
